More power for your diagnosis with the

DIAGNOSTIC INTERFACE WOW! LOOQER

ABSOLUTELY ESSENTIAL
for real vehicle experts
and all diagnostic specialists

Benefit from the multi-brand diagnostic interface WOW! LOOQER
(Art. Nr. W072 003 000) with full functionality and the newest technology.

Everything you need for today and for tomorrow
Looking into the future for new possibilities

- **CAN-FD** for fast CAN bus communication in future vehicle technologies
- **DoIP –** Diagnostics over Internet Protocol (ISO 13400-2) for reading the latest vehicle technology
- **Pass Thru** J2534 compatible VCI hardware for use with OE diagnostic software
- WiFi and Bluetooth technology

The key to successful diagnostics on Security Gateway protected vehicles
Simple. Fast. Save.

- Manufacturer-independent and multi-brand work on vehicles that are secured with security gateway systems
- Familiar and standardised user interface with familiar terms in the LOOQIT software
- One-time authentication of just one authorised person and simple addition of further users

Less is more
Small diagnostic interface on the market with full functionality and the latest technology

- Small, handy, light, robust, workshop-ready
- Use as you need it: as a small, wireless dongle or via enclosed cable

Relevant data with the Flightrecorder
Connect, drive off, record mobile data, evaluate later

- Save pre-selected data on the internal hard drive during the journey without any further input device
- Later analyse everything in detail with the WOW! software
- Without a co-driver, without cables, without problems
- Save time and money
